

Specter OS4X - LIGHTWEIGHT COMBAT OPTICAL DAYSIGHT (LDS)

specterOS4x

Lightweight combat daysight by ELCAN

**SPECTER OS4X - LIGHTWEIGHT
COMBAT OPTICAL DAYSIGHT**

Specter OS4X Overview:

The SpecterOS4x by ELCAN is a rugged lightweight optical day sight (LDS) designed for 5.56 NATO standard light arms (e.g. SA80, C7, M4). The SpecterOS4x LDS utilizes the superior optics and mechanics of the commercially available SpecterDR by ELCAN. The SpecterOS4x is a fixed 4x magnification optical sight with a large exit pupil and long 70mm eye relief. The bright, high resolution 4-power optics provide optimum target acquisition and identification.

Superior situational awareness is achieved due to the ultra-wide viewing angle and unmatched viewing in low-light conditions. The sight is fitted with an illuminated reticle that attracts the eye to the aim point of the sight.

SpecterOS4x is an lightweight optical day sight with no compromise on performance.

System Benefits:

- Ultra-lightweight optical day sight
- Superior optical performance
- Large 8 mm exit pupil diameter provides excellent dawn/dusk and night performance
- Generous 70mm eye relief
- High efficiency broadband coatings for extended low light performance
- Integrated, patent-pending lever-lock mount for optimum weight reduction
- Rugged, Reliable performance
- Shock Protected Precision Optics

Specter OS4X - LIGHTWEIGHT COMBAT OPTICAL DAYSIGHT (LDS)

Specter OS4X nominal specifications

Dimensions	153.4mm x 73mm x 69mm
Magnification	4x nominal
Field of View	6.5° nominal
Weight	528 grams nominal (excluding CQB mount, lens cover)
Entrance Pupil Diameter	32mm nominal
Exit Pupil Diameter	7.8mm nominal
Eye Relief	70mm nominal
Battery	DL 1/3N
Battery Life	Min 300hours @ max brightness

Specter OS4X

Uses a bright red spot (LED illumination) for close-quarters aiming, plus a ranged LMG reticle for accurate precision engagement from 400m to 800m (5.56 graticule).

Weapon Types: SA80 utilizing standard (MIL-STD-1913) Picatinny rail mount in addition to other combat weapons

Controlled Products Availability

Please note that all Specter and PhantomIR sighting systems are advanced technologies that are subject to export licensing. International Traffic in Arms Regulations (ITAR) also controls the acquisition and export of PhantomIR and PhantomIRxr. Please contact your ELCAN Sales Manager for further information on technology restrictions and product availability.
